

Open BlackBerry Integration for Your Messaging and Collaboration Demands

BA introduces BlackBerry®

BlackBerry and BA work together to develop open source solutions that consists of smartphones integrated with software that enables access to email and other communication services, such as calendaring, intranet, extranet, ERP and CRM.

What is Open BlackBerry Integration?

BlackBerry solutions give mobile users access to their company email, calendar, data, applications and internet information services from a smartphone. All BA integrated solutions are customized to meet the needs of one person or an entire enterprise, to any scale, in any technology.

Till now the BlackBerry Enterprise Server (BES) could only be integrated for collaboration and productivity software from Microsoft, Novell and IBM. Most companies are switching to better and free messaging platforms, based on open source software and Linux powered systems.

Cost Effective Alternative via Free Open Source

BA has a laser sharp focus on open source software, systems and standards. BA has built up a solid client base in the last 12 years, having served hundreds of customers with more cost effective IT solutions, infrastructure, collaboration and messaging platforms and security solutions.

Why Open BlackBerry Integration from BA?

The BlackBerry expert skills and custom developed Open BlackBerry Integration middleware from BA allows existing and new BlackBerry customers to have push email up and running within days, based on open source messaging platforms.

BA allows you to integrate your open source business email and collaboration systems, providing you with a wireless extension of your corporate email mailbox, as well as additional features including corporate data access, calendar synchronization and remote address lookup.

How does it work?

BA's Open BlackBerry Integration for Mail (OBI4mail) will support every open messaging and groupware platform. If your groupware solutions supports IMAP, ICAL and/or LDAP it will work with OBI4mail. Tested environments include:

Apple Ical Server, Mdaemon, Exim, Postfix, Sendmail, Qmail, Courier-IMAP, Qmail, Gmail, Google Calendar (read only), E-groupware, Openexchange, Kerio, Zimbra, Zarafa, Cyrus-IMAP.

If your mailplatform is not on this list please ask us and we will do a test right away !

About BlackBerry Enterprise Server

The BlackBerry Enterprise Solution provides push-based access to email; calendar, contacts, tasks and notes; instant messaging; web-based applications and services and enterprise applications.

About Research in Motion - RIM

Research in Motion's BlackBerry smartphone allows you to stay in touch with everything that matters to you while you're on the go with a BlackBerry. Email, phone, maps, organizer, applications, games, the Internet and more.

About BA

BA offers IT consulting, integration solutions and support services for large enterprises and small businesses. The company employs ten open source and Linux experts delivering integrated business applications, collaboration systems and secure managed infrastructure based on open source and Linux.
